

## Calibrate the speed

1. Stay off the running belt during this procedure.

**CAUTION:** *Serious injury or damage to machine can occur. To avoid injury or damage the following procedure must be followed. STAY OFF THE RUNNING BELT during this procedure. Place your feet on the two top steps. Treadmill will accelerate unexpectedly.*

1. Plug the power cord into the power outlet. The treadmill will lower itself. Wait until the treadmill resets its elevation to 0%.
2. Verify the power cord is not being pinched under the front of the treadmill.
3. Press and hold down the **Heart Rate** and **Level** keys simultaneously for five seconds to enter *Test Mode*. When the **Heart Rate** and **Level** keys are released the software revision "rx.x" is shown on the display.
4. Press and hold the **Heart Rate** and **Time** keys. The display will show "CAL". The running belt will accelerate to three different speeds and when completed the display will show "SAV".
5. Press **Pause/Stop** to exit *Test Mode*. If **Pause/Stop** is pressed during this procedure the calibration will not be stored. Exiting *Test Mode* while the belt is moving may generate an error condition.

If the calibration procedure was not performed successfully, treadmill errors 1, 2, 3 and/or 6 will occur.

## Complete installation

Operate the unit at all levels to verify proper operation.
